

Paras

Data Analyst

linkedin.com/in/paras-dhankhar | github.com/Paras0205 | parasdhankhar02@gmail.com | +91 9896490226

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Excel, Power BI, Machine Learning, and Statistics. Skilled in data analysis, ETL, data wrangling, EDA, feature engineering, data visualization, dashboard development, KPI reporting, documentation, and building predictive models using Scikit-learn. Strong analytical mindset with a passion for transforming data into actionable insights to solve real-world business problems.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2023-2027

Panipat Institute of Engineering and Technology, Panipat, Haryana

TECHNICAL SKILLS

- Languages & Databases: Python, SQL, MySQL
- Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- Visualization & BI Tools: Power BI, Microsoft Excel, Google Sheets
- Tools & Platforms: GitHub, Jupyter Notebook, VS Code, Google Workspace
- Core Competencies: Data Analysis, Exploratory Data Analysis, Data Wrangling, Feature Engineering, Predictive Modeling, Dashboard Development, Data Visualization, KPI Reporting, Statistical Analysis

EXPERIENCE

Data Analytics Intern

July 2025 – Aug 2025

Pickl.AI by TransOrgAnalytics — Remote

- Collected, cleaned, and analyzed IPL match datasets (2008–2024) using Python, performing EDA and feature engineering to identify team and player performance trends and data relationships.
- Built data visualizations using Matplotlib and Seaborn to translate findings into clear, stakeholder-ready analytical reports.
- Developed and evaluated a Random Forest Classifier using Scikit-learn, achieving 68% accuracy predicting IPL match outcomes.

Data Analytics Intern

July 2024 – Aug 2024

AppSquadz Technologies — Remote

- Analyzed 149K+ transaction records using SQL and Excel to uncover sales trends and built an interactive Excel dashboard tracking \$98K+ in sales.
- Identified coffee as the top revenue contributor (39%) and peak morning demand, presenting insights to support business decisions.
- Performed data cleaning, validation, and preprocessing to ensure accuracy across all transaction datasets.

PROJECTS

Customer Churn Prediction System | Python, Scikit-learn, Streamlit | GitHub | Live Demo

2026

- Developed an end-to-end machine learning pipeline for customer churn prediction using telecom customer data, achieving 96.45% accuracy and 0.992 ROC-AUC.
- Built an interactive Streamlit web application with real-time predictions, churn analytics dashboards to support customer retention decisions.

Ecommerce Order Return Prediction | Python, Scikit-learn, Streamlit | GitHub | Live Demo

2026

- Built an end-to-end ML pipeline using CatBoost Classifier to predict order return likelihood from customer, product, and order features, achieving 0.73 ROC-AUC and 67% accuracy on imbalanced order data.
- Deployed an interactive Streamlit dashboard with real-time return probability, risk-level scoring, and business recommendations, enabling proactive decisions before shipping.

Pizza Sales Analysis & Power BI Dashboard | SQL, Power BI | GitHub

2026

- Analyzed pizza sales data using SQL and developed an interactive Power BI dashboard to track revenue, product performance and customer demand.
- Identified high-revenue products, contributing to \$375K+ revenue from 18K+ units sold, enabling data-driven business decisions via stakeholder reporting.

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google 2026
- SQL for Data Analysis – Simplilearn 2025
- Python for Data Science, AI and Development – IBM 2025
- Excel for Data Analysis — Coursera 2025
- Power BI for Data Analysis – Microsoft 2025

ACHIEVEMENTS & LEADERSHIP

- Selected for Smart India Hackathon (SIH) 2025.
- Served as Student Coordinator for an AI Bootcamp organized by C-DAC Pune coordinating with participants and mentors.
- Earned Gold Badges in SQL and Python on HackerRank, demonstrating strong SQL querying and problem-solving skills.
